Skills

- Git
- HTML
- Angular
- CSS
- TypeScript
- Python
- C#
- Teamwork
- Communication
- Time Management
- Adaptability

Certifications

- [MEAN](#) by Maximilian Schwarzmüller
- [SoC Analyst](#) by LetsDefend.io

Education

• Computer Science

International Hellenic University, (IHU)
2018-2023

Languages

- Greek - Native
- English - C2 Certified

Experience

• IT Assistant

31st CIS Company NRDC-GR

01/2024 - 11/2024

During my enlistment in the Greek army, I was selected to serve in the 31st CIS Company at NATO's Headquarters in Thessaloniki.

- Technical Support: Resolved user issues related to IT systems, ensuring smooth operations
- Process Automation: Developed Python scripts to automate repetitive tasks, improving efficiency within the IT department

• Frontend Web Developer (Internship)

SOFTWeb - Adaptive I.T. Solutions

05/2022 - 10/2022

Worked as part of a development team on a real-world application, focusing on front-end features and bug fixes. Key responsibilities included:

- Technologies Used: Angular, SCSS, TypeScript, and C#
- Codebase Maintenance: Debugged and optimized the existing front-end code for enhanced performance and stability
- Client Collaboration: Participated in regular online meetings with clients and the IT team to gather feedback and deliver updates.

Project

• Advanced Attendance System (Python, SQLite)

International Hellenic University

03/2022 - 09/2022

[GitHub Link](#)

Developed an advanced employee attendance system integrating RFID smartcards and facial recognition for secure workplace access.

Key features include:

- CRUD Operations: Implemented Create, Read, Update, and Delete functionalities for managing employee data, with role-based access control.
- Authentication: Utilized RFID and facial recognition for real-time authentication of employees.
- Data Management: Stored employee check-in/out data in SQLite, exported reports to CSV, and visualized data using custom-generated diagrams for better insights.

• Pharmacy Information System (C#, SQL)

International Hellenic University

03/2021 - 06/2021

[GitHub Link](#)

Contributed to the development of a pharmacy management system responsible for inventory tracking, order management, and profit analysis. My contributions included:

- System Design: Designed critical diagrams (Structure Diagram, Data Flow Diagram, Entity Relationship Diagram, Class Diagram) to guide system architecture and development.
- Inventory and Profit Management: Built modules to handle pharmacy stock, track product orders, and generate profit reports at weekly, monthly, and yearly intervals.
- Data Visualization: Created reports for tracking profit per product category, improving decision-making for stock and pricing strategies.
